What Is the Framesi Color Chart?

The Framesi color chart is a visual guide that displays all the hair color options offered by Framesi, a renowned Italian hair color and styling brand. It serves as a reference for selecting shades based on their tone, depth, and intensity. The chart typically features a range of colors categorized into different families such as blondes, brunettes, reds, and special tones like pastels or metallics.

The primary purpose of the Framesi color chart is to help colorists quickly identify the desired shade, understand the underlying tones, and determine how different colors will interact when mixed or layered. It is an essential tool for achieving predictable, uniform results and for customizing hair colors to suit individual client preferences.

Structure of the Framesi Color Chart

Understanding the layout of the Framesi color chart is key to making the most of its features. The chart is generally organized into several sections:

1. Color Families

- Blonde Shades: Light, medium, and dark blondes with varying undertones.
- Brunette Shades: Ranging from light to dark browns, including ash, caramel, and chocolate tones.
- Red Shades: From strawberry blondes to deep copper reds.
- Special Tones: Including pastels, metallics, and fashion shades.

2. Tone and Depth Indicators

Each shade is labeled with a combination of numbers and letters that indicate:

- Depth: The darkness or lightness (e.g., 10 for very light, 1 for very dark).
- Tone: The underlying hue or undertone (e.g., A for ash, N for natural, C for copper, G for gold).

3. Color Swatches

Visual representations of each shade are displayed as small color swatches, allowing easy comparison and selection.

4. Formulation Guides

The chart may include recommendations for mixing ratios, developer levels, and techniques to achieve specific shades.

How to Interpret the Framesi Color Chart

To effectively use the Framesi color chart, it?s essential to understand its labeling system and visual cues.

Understanding Shade Codes

Most Framesi colors are labeled with a combination of numbers and letters, such as 8N or 5C:

- Numbers (1-10): Indicate the lightness or darkness of the shade, with 1 being black/dark and 10 being very light/blonde.
- Letters (N, A, C, G): Denote the tone:
- N (Natural): Neutral shades without significant undertones.
- A (Ash): Cool, muted tones with blue or green undertones.
- C (Copper): Warm, reddish tones.
- G (Gold): Warm yellow or golden undertones.

Using the Chart for Color Customization

By combining different shades and tones, colorists can create custom hues:

- Mixing a 7N (medium blonde, natural tone) with a small amount of 8G (light blonde, gold tone) can produce a warm, honey-like shade.

- Layering ash shades over existing color can neutralize unwanted warmth.

Matching Shades to Client Preferences

The visual swatches and codes help clients and stylists find the closest match to the desired outcome, whether it's a subtle highlight or a bold fashion color.
